Office Action Summary	Application No. 10/657,513	Applicant(s) BODLEY ET AL.	
	Examiner Jack Chiang	Art Unit 2642	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

CLAIMS

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaefer et al. (US 4688262) in view of Iwata (US 4654883).

Regarding claim 1, Schaefer shows a radio device comprising:

A housing (10, 12);

An aperture having at least one keyway (28);

An attaching pin having a shaft (30) which has a key (34) received within the keyway (28);

An attachment point for receiving a lanyard (see 26);

The pin (30) and lanyard (26) may be quickly removed from the radio device (10, 12).

Schaefer differs from the claimed invention in that the radio device is not headset having a transducer.

However, Iwata teaches providing a radio device which is a headset having a transducer (fig. 1).

Hence, it would have been obvious for one of ordinary skill in the art to apply

Schaefer's attachment pin in a radio/headset, such as those shown by Iwata. This simply can be considered as an intended use of Schaefer, because the Schaefer's term "portable radio" is generic for devices, such as wireless headset. In fact, the concept of

Art Unit: 2642

applying Schaefer's attachment pin from one type of device to another would not change the basic concept of Schaefer, therefore, it is considered as an intended use of Schaefer.

Regarding claim 2, the combination of Schaefer and Iwata shows:

The shaft (30) which is slightly larger than the aperture (28), it creates limited frictional impediment to rotation and preventing the shaft from falling out even if the key and the keyway are aligned.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728. The examiner can normally be reached on Mon.-Fri. from 8:00 to 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ahmad Matar, can be reached on 703-305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
